	Examiner Haythim J. Alaubaidi	Art Unit 2171	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This communication is a First Non-Final Office Action in response to Application No. 10/026600, Filed on December 20, 2001.
2. Claims 1-11 are presented for examination, of which claims 1 and 7 are independent.
3. Claims 1-5 and 7-10, are rejected under 35 U.S.C. 102(e).
4. Claims 6 and 11, are rejected under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-5 and 7-10, are rejected under 35 U.S.C. 102(e) as being anticipated by Kazuhiro Shitama (U.S. Patent Application Publication No. 2003/0149601 and Shitama hereinafter).

Regarding Claims 1 and 7, shitama discloses;

(1) submitting a connection request via a terminal device to the server; (figure 1, elements 50, 20, 40 and 10 and corresponding text; see also Page 1, Para 0012)

(2) determining via the server if to accept the connection request from the terminal device; wherein if the request is accepted, step (3) is proceeded; or else, the step (2) is returned; (figure 3, elements S2-S4 and corresponding text)

(3) storing an IP (Internet protocol) address of the terminal device that submits the connection request via the server into an IP address temporary storage area; (Pages 2-3, Paragraph 0036; see also Pages 3-4, Paragraphs 0056 and 0059)

(4) starting timing via the server and determining if counted time reaches a preset time value of data retrieval that is pre-stored in the server; wherein if the preset time value is reached, step (5) is proceeded; or else, the step (4) is returned; (Figure 5, Element SS4; see also Figure 6 and corresponding text)

(5) executing one-time data retrieval via the server for retrieving data from a database, and transmitting the retrieved data to the terminal device whose IP address is stored in the IP address temporary storage area; and (Figure 5, Elements SS1-SS5 and corresponding text; see also Figure 7, Elements SQ1-SQ3 and corresponding text)

(6) requesting via the terminal device for terminating connection to the server upon receiving the retrieved data, allowing the server to stop transmitting data to the terminal device (Figure 6, Element SP4 and corresponding text; see also Figure 7, Element SQ4 and corresponding text).

Regarding Claims 2-4 and 8-10, shitama discloses TCP and UDP (Page 3, Paragraph 0055; see also Page 4, Paragraphs 0068 and 0070).

Regarding Claim 5, shitama discloses wherein the database is established in an auto-controls device, for storing data generated during operation of the auto-control device Figure 2, Elements 31 and 35 and corresponding text).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 6 and 11, are rejected under 35 U.S.C. 103(a) as being unpatentable over Kazuhiro Shitama (U.S. Patent Application Publication No. 2003/0149601 and Shitama hereinafter).

Regarding Claims 6 and 11, shitama discloses all of the claimed subject matter set forth above, except the reference does not explicitly indicate the step displaying the data, however Official Notice is taken that displaying data in a database environment is a well known feature in the database art. Given the intended broad application of shitama's reference, it would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to modify the teachings of shitama by adding the

display feature in order to allow a user to monitor the process of data or to increase the systems usability and flexibility through the use of a display.

Other Prior Art Made of Record

9. a. Sitaraman et al. (U.S. Patent No. 6427170) discloses an integrated IP address management; and
b. Cabral (U.S. Patent Application Publication No. 2003/0149601) discloses a network billboard system and method thereof

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
